**ENVIRONMENTAL POLICIES
(LAST UPDATED: JANUARY 28, 2023)**

King LB Metal Ltd. ("KLBM") is committed to doing its part for a "sustained earth". Everyone benefits by following a sound policy that serves to minimize environmental impact. KLBM will work to conduct business activities following sound environmental policy and industry leading practices, to minimize the ecological footprint.

KLBM's goal is to minimize, and where possible, eliminate any environmental effect its work activities may have. Commitment to the promotion of sound ecological practice, as well as the prevention of harm to the environment and the preservation of the quality of the local, national, and global ecosystems are of paramount importance. Our intent is to minimize, as much as it is reasonably practicable, the environmental risks associated with work processes, and to maintain low-waste emissions.
